## SIDINGRAIL™ SYSTEM: ENGINEERED RAIN SCREEN SOLUTION FOR LAP AND SHEET SIDING

**THE SIDINGRAIL™ SYSTEM ENABLES THE USE OF ENGINEERED WOOD, FIBER-CEMENT OR VINYL LAP SIDING AND ROLL FORMED METAL SIDING.**

The system is available in two efficient iterations: SL or CI. SL-SidingRail offers the same versatility as the Knight LevelTek™ System, featuring Knight's patented self-leveling system. This system includes a ½-inch rain screen cavity and an industry leading efficient use of exterior insulation through an engineered thermal isolation system, ThermaStop™. CI-SidingRail, based off the CI-System, features the industry's only ASHRAE compliant continuous insulation solution and a ¾-inch rain screen cavity. Each system is constructed of high corrosive-resistant 18 gauge Galvalume® coated steel.

### KNIGHT SIDINGRAIL SYSTEM ADVANTAGES:

- Energy and functionally efficient.
- Quick and easy installation.
- Pre-engineered and tested.
- Versatile cladding options.

All Knight Wall Systems components are manufactured in the USA.  
(Patent Pending)

### KNIGHT'S SIDINGRAIL SYSTEM CAN CONTRIBUTE TO THE FOLLOWING USGBC LEED CREDITS:

- Energy & Atmosphere (EA) Credit 1
- Materials & Resources (MR) Credits 2, 4 and 5
- Indoor Environmental Quality (EQ) Credits 2 and 7.1
- Innovation & Design (ID) Credits 1.1 – 1.5
- Regional Priority Credits 1.1 – 1.4
